Why

The Lapeer and Upper Thumb Association of Realtors represent each of us in our daily business activity. The Board of Directors is responsible for how the day-to-day activity impacts the members. They are also responsible for setting the short- and long-term goals of the Association, how to meet those goals and how they impact each of us. Board members must remain business neutral and work for the common good of all members and associate members. I feel my prior experience with project management and long-term planning is a valuable asset to the board and all members of the association.
